Poole to Tokyo

Dorset based installer Superyacht-AV brings the premium sound of our flagship Platinum II Series speakers to a luxurious Sunseeker yacht.

Docked just south of Tokyo, Japan is this incredible Sunseeker yacht, packed to the brim with Monitor Audio speakers and other smart AV solutions. Before travelling to its current location, the yacht named MySkye was docked at Sunseeker's Superyacht Boat Yard in Poole, UK during its installation.

Starting at the Flybridge – the main outdoor entertainment zone – 6 **AWC280** All Weather speakers were used to provide music to the wet bar, hot tub and BBQ dining area. 2 **AWC265** All Weather speakers were used to cover the rear sunbathing area, 4 more were used for the Bow and forward sunbathing area.

Mid-ship, 2 **AWC280s** were installed to cover the pop-out breakfast balcony, finally 4 **AWC280s** were used on the aft cockpit dining area.

Monitor Audio's All Weather speakers were perfect for the exterior of a yacht, as they're resistant to water, weather and salt spray.

Inside the yacht in the VIP cabin, 2 Platinum **PLIC II** In-Ceiling speakers were used to accompany a TV providing music and TV audio to guests. Over in the owners cabin, a home cinema system was installed using 2 **C265-IDC** speakers for the left and right channels, a pair of **CSS230** speakers were used for the surround channels, a **WSS430** was used as the centre channel and a **CW8** Custom Subwoofer was installed beneath the bed.

In both of the guest cabins, **CSS230** speakers were used to cover audio from the TV in each cabin. Down in the crew area, our Controlled Performance **CP-CT380IDCs** were used to accompany their TV. Controlled Performance features a sealed back box that reduces sound escaping to the floor above.

On the main deck, a pair of Platinum **PLIC II** In-Ceiling speakers are used to entertain guests in the bar. Finally, in the Saloon a 7.2 surround sound system was installed. This featured an incredible 6 Platinum **PLIC II** In-Ceiling speakers for the left, right, side and rear channels, a **WSS430** for the centre channel and a **CW8** subwoofer hidden under the rear sofas.

More about the installer

Installer Charles Bradley has spent the last 25 years working as a live sound engineer, mixing for A-list artists such as Annie Lennox, Simply Red, Snow Patrol and Shakira.

Bringing what he knows from live music, Charles uses a special room mapping and audio tuning system to create great soundscapes in his AV installations.

Taste of música

A restaurant in Leiden, Netherlands matches authentic Latino flavours with atmospheric surroundings and sounds of South America.

Bringing the best Latin American food and drink to the South Holland city of Leiden is the new Tabú restaurant.

Outfitted in a modern cantina style, Tabú delivers an exciting dining experience and its very own cocktail bar.

If the sights and smells don't immerse you, the sounds of the continent's distinctive music style will with the numerous Monitor Audio speakers strategically placed throughout the restaurant by installer Number One.

Monitor Audio's ultra-versatile **Vecta V240** speakers can be found in the corners of the restaurant, blending into the surroundings.

In the ceilings, Number One used **C165-T2** In-Ceiling speakers and slim **CS180** In-Ceiling speakers to deliver music from above. Concluding the audio experience, **IWS-10** In-Wall Subwoofers were used for powerful bass.

All of the speakers in the restaurant are run from two Monitor Audio **IA150-8C** Amplifiers, connected to streamers and DJ equipment.

Listen in luxury

A newly refurbished home in London, UK receives a complete overhaul featuring luxurious furnishing, high-tech entertainment equipment and discreet audio.

This Victorian terrace home, situated in Belgravia - one of London's most affluent districts - has received an incredible transformation, adding new living spaces, bathrooms and a home cinema.

The home cinema uses our Controlled Performance **CP-CT280-IDC** In-Ceiling speakers, **C265-FX** In-Ceiling speakers and a **IWS-10** In-Wall Subwoofer.

There's even more sound throughout the home, including Controlled Performance **CP-CT260** In-Ceiling speakers in the kitchen, **CP-CT150** In-Ceiling speakers in the master bedroom, **C165-T2** In-Ceiling speakers in the bathroom and **Climate 60** On-Wall speakers in the garden area at the back of the house.

In-room entertainment

Monitor Audio installer Majik House along with AquaJade Bathrooms created AbsoluXe, a hotel experience encompassing four themed suites packed with smart home technology.

Our Custom Install speakers have recently been installed into a unique hospitality experience in the beautiful market town of Kirkby Lonsdale, Cumbria in the UK.

Each suite is fitted with simple, effective technology to wow the guest featuring Monitor Audio speakers in all suites, bathrooms and bedrooms.

Tim Burrow of Majik House explains his choice:

"We chose the stereo mono C180-T2 In-Ceiling version speakers for 2 reasons: quality of sound and the seamless merging with the ceiling as the aesthetics were important for this luxury establishment."

C280 In-Ceiling speakers were also used in the bedrooms and lounge to give an enhanced sound experience."

Poolside cinema

The talented team at InTech found unique solutions for building a powerful home cinema into their recent smart home installation in Tel Aviv, Israel.

This new, ultra modern home in the Mediterranean city of Tel Aviv features advanced audio throughout the house, inside and out.

The home cinema / bar uses a creative mixture of our floorstanding **Silver 300** speakers for the left and right channels, with a **SoundFrame 2** In-Wall speaker as a centre channel, and a **Silver W12** Subwoofer all cleverly hidden behind a fabric wall. **C265-FX** In-Ceiling speakers are used as surround channels.

On the poolside terrace, a pair of **Climate 60** On-Wall speakers were installed in the dining area.

Music built-in

The team at Infinite Home Theatre have recently finished work on an AV installation at 'The Long Beach' luxury home in Idaho, USA and it's packed inside and out with Monitor Audio speakers.

Credits
 Installer: Infinite Home Theatre
 Location: The Long Beach - Idaho, USA

The project included 75 Monitor Audio speakers including 22 **C180** In-Ceiling speakers throughout the living areas, kitchen, exercise room and 'Full Swing' golf simulator.

Two separate home theatres house **C265-IDC** and **C380-IDC** In-Ceiling speakers with **IWS-10** In-Wall Subwoofers and **IWA-250** Amplifiers.

Outdoor and balcony decks showcase the weather resistant **Climate 60**, **Climate 60-T2** and **Climate 80** On-Wall speakers.

Sun, Sand, Surf and Sound

This fully renovated home in Gold Coast, Australia gets Monitor Audio sound throughout.

Monitor Audio installer TVinstallers have recently completed work on a beautifully renovated house in Runaway Bay on the Gold Coast in Australia. To match the high-end finishes in the house, the owners invested in a great sound system but wanted to keep it as low profile as possible.

In the kitchen, an invisible sound solution was high priority. The central island counter is made from 2" thick Calacatta marble, so the owners didn't want any visual distractions. It was decided that **IV140** Invisible speakers would be used in the room.

Our **IV140** Invisible speakers are installed into the wall and are covered with plaster, making them completely invisible once finished. This ensured that the kitchen would receive incredible sound quality, without a speaker in sight.

Outside by the pool, TVinstallers fitted our **AWC280** In-Ceiling All Weather speakers. Our All Weather speakers have been designed to withstand exposure to all elements, and makes a great splash-proof poolside addition.

Lastly, the owners wanted a high quality surround sound system for their TV nook upstairs. Due to limited space along the walls, TVinstallers opted for **C280-IDC** In-Ceiling speakers. Our IDC speakers feature a pivoting mid-range driver and tweeter module, allowing for high performance directional audio.

The owners were left very happy with the install and performance of the products, and as the house has been pre-wired there might be more Monitor Audio products going in soon!

Did you know?

Our IV140 Invisible speakers are installed into stud walls then are plastered and decorated over, creating a completely invisible speaker buried into the wall.

Expertly engineered, the speakers deliver brilliant sound quality that sounds as clear as a conventional In-Wall speaker.

Suburban Sanctuary

This beautifully renovated home in the north of England received a total entertainment overhaul by Monitor Audio installers Majik House

Aesthetics were of utmost importance to the clients for this project, so all of the entertainment features needed to be as discreet as possible.

Starting in the living room, Monitor Audio **C165** In-Ceiling speakers were used as a stereo sound system for the TV along with our **IWS-10** In-Wall subwoofer, allowing for hidden high-quality sound as an upgrade for the TV's existing speakers.

Monitor Audio In-Ceiling speakers were used throughout the rest of the living spaces such as the kitchen, bedrooms and bathrooms to deliver music around the house, all controlled through the Control 4 automation system.

Outdoors, the garden was made smarter with the inclusion of WiFi access points and smart lighting. Also outdoors, Majik House installed our **Climate 60** On-Wall speakers, that are able to withstand all of the elements whilst bringing their favorite tunes outdoors.

The pride of place is the incredible Dolby Atmos configured home cinema. Matching the Epson HD projector, our **W380-IDC** In-Wall speakers are used for the left, right and centre channels. Our **CS180** and **C165** In-Ceiling speakers for the surround and Atmos channels with our **IWS-10** In-Wall subwoofer for punchy bass.

Sea of Sound

Take a look at this incredibly luxurious yacht featuring Monitor Audio Custom Install speakers throughout.

Monitor Audio installers Interior Audio finished work this year on an Ocean Alexander 90R yacht, introducing In-Ceiling audio to almost every space.

Due to the restricted depth on board, the installer used our **CS180** Slim speakers throughout the interior spaces. They used a mixture of round and square grilles to fit the designer's vision, and painted the grilles to blend them into the space for an even more discreet system.

(4th Generation)

The home cinema is comprised of a 4K projector, Denon Atmos AV receiver, a UHD Blu-ray player, a 4K streaming box and thirteen Monitor Audio speakers.

The left, centre and right channels are made up of three **CP-WT380IDC** In-Wall speakers.

The four surround channels use **CP-WT380** In-Wall speakers. Four **CSS230** Super Slim In-Ceiling speakers are used for the Dolby Atmos system and two **IWS-10** In-Wall Subwoofers with a **IWA-250** Amplifier round-off the whole experience.

All of the speakers are either hidden behind the screen or behind the acoustically transparent walls.
